

Q&A – Call for Proposals – Feminist Tech & Innovation Lab

- 1) What is the geographic scope of the project outlined in this Call for Proposals?
 - a. As this call for proposal is for the set-up and roll out of a Global Feminist Technology and Innovation Lab, proposals must be global in scope. In this regard, applicants from country level organizations or proposals focused on country level interventions, or interventions in only one region are not eligible for this specific call for proposals.

- 2) What is the geographical eligibility of the organizations applying for this Call for Proposals?
 - a. As this call for proposal is for the set-up and roll out of a Global Feminist Technology and Innovation Lab, proposals must be global in scope. In this regard, applicants from country level organizations or proposals focused on country level interventions, or interventions in only one region are not eligible for this specific call for proposals

- 3) Can organisations apply in a consortium?
 - a. Yes, the responsible party must be a Civil Society Organization, academic/research institution or a consortium of organizations specialized in technology, innovation, advocacy and learning/capacity strengthening on gender equality and/or violence against women and girls. If applying as a consortium, please be detailed in the proposal regarding the roles and responsibilities of each member of the consortium, including who the lead organisation is. Please also note that the lead organization must meet the competencies criteria outlined in the call for proposals as well as all of the minimum criteria outlined in Annex B-1.
